HungerMap LIVE: Hunger and COVID-19 Weekly Snapshot | Chad | 29 May 2020

OVERVIEW

15.5M Population (World Bank, 2018)
0.5M People in IPC/CH Phase 3 or above (IPC/CH, Jan 2020-May 2020)
5.6M Chronic hunger (FAO STAT, 2016-2018)
2.2M People with insufficient food consumption* (WFP, May 2020)

NUTRITION

13.3% of children Acute malnutrition (JOINT MALNUTRITION ESTIMATES – UNICEF, WHO, WORLD BANK, 2015)
39.8% of children Chronic malnutrition (JOINT MALNUTRITION ESTIMATES – UNICEF, WHO, WORLD BANK, 2015)

MACRO-ECONOMIC

Import dependency 6.0% of cereals (May 2020)

Data source: WFP's calculation based on USDA data

Currency exchange

Data source: Trading Economics

Headline and food inflation

Data source: Trading economics

FOOD SECURITY TRENDS (May 2020)

Number of people with insufficient food consumption*

Prevalence of insufficient food consumption*

To trigger a food consumption (FC) alert, marked deteriorations should meet the threshold of deterioration in FC (from one month to the next) relevant to the existing percentage of the population that already has insufficient food consumption (IFC):
- <20% with IFC: requires a 25% deterioration in FC
- 20-30% with IFC, requires a 30% deterioration in FC
- >30% with IFC: requires a 10% deterioration in FC

Required to trigger a food consumption (FC) alert, marked deteriorations should meet the threshold of deterioration in FC (from one month to the next) relevant to the existing percentage of the population that already has insufficient food consumption (IFC):
- <20% with IFC: requires a 25% deterioration in FC
- 20-30% with IFC, requires a 30% deterioration in FC
- >30% with IFC: requires a 10% deterioration in FC

COVID-19 impacts on households, specifically the access to health services, markets and livelihood change/impacts. This will help WFP and other agencies monitor the situation, capture problems in real time and provide the necessary information for early action and mitigation.

WFP’s Hunger Monitoring Unit (previously known as mVAM) conducts continuous food security monitoring via phone interviews. Data is collected on a rolling basis and processed daily. Daily updates represent a snapshot of the current situation over the past 14 days for health and market access and 28/30 calendar days for livelihood coping. Note that there is a slight time lag of 2-4 days to ensure data quality. From this week onward: the data on health/market access and livelihood coping has transitioned from reporting the number of people affected to the number of households affected. In light of the recent Coronavirus Disease (COVID-19) outbreak, these systems have been expanded to monitor COVID-19 impacts on households, specifically the access to health services, markets and livelihood changes/impacts. This will help WFP and other agencies monitor the situation, capture problems in real time and provide the necessary information for early action and mitigation.
