The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the United Nations.

The analysis covers 100% of the country’s total population of 1.2 million people.

The population in Crisis or worse (IPC Phase 3 or above) is expected to persist at similar levels between the 2021 and 2022 lean seasons.

29% of the population analysed was forecast to be in Crisis or worse (IPC Phase 3 or above)

Out of 11 areas analysed, eight, including Hhohho, Lubombo, Manzini and Shiselweni urban, are expected to be in Crisis (IPC Phase 3), and the remaining three – Highveld cattle and maize, Moist middleveld and Timber highlands – in Stressed (IPC Phase 2).
